We are in the midst of the worst drug crisis in US history. The prescription drug and heroin epidemic is front-page news. However, alcohol, marijuana, amphetamines and other drugs are frequently abused, and can be just as deadly. Drug addiction does not discriminate on the basis of age, race or socioeconomic level.

Our children are faced with deciding whether or not to use drugs at younger ages than ever before, and earlier drug use increases the risk of addiction. We encourage parents and other concerned community members to attend this program in order to learn about:

- **Drugs popular with teens and young adults, including marijuana & vaping**
- **Signs and symptoms of drug use**
- **Effects of use on health, relationships, and life goals**
- **Local resources & how to get help**

This project is funded, in part,  
under a contract with the  
Pennsylvania Department of Drug  
and Alcohol Programs with  
Lehigh and Northampton County  
Drug and Alcohol.
